## Out-of-Network

Costs may be higher than an in-network provider. Patients should contact their health plan to find out if they can choose Quest. For Managed Medicaid or Medicare Advantage plans, even where out-of-network, patients typically do not have increased out-of-pocket costs for covered services.

the contract between the health insurance company and the above respective company.

\*For out-of-area BlueCross BlueShield plan members, network status is generally determined by the ordering physician's zip code and Quest's contract with the Blues plan in that service area. Patients should call the Member Services telephone number on their member ID card to verify their out-of-area benefits. In Pennsylvania, in Bucks, Chester, Delaware, Montgomery, and Philadelphia counties, claims may be treated as out-of-network. When selecting "location" on the site, users should select the ordering physician's state, rather than the lab collection state, if these locations differ.

\*\*Network status may vary depending on the lab draw location (e.g., county) within the state. If you are a patient, call the Member Services telephone number on your member ID card to verify whether or not Quest is in-network with your plan. If you are a physician, call your Quest sales representative for more details.

\*\*\*Network status varies for certain members or plans within this health insurance company. If you are a patient, call the Member Services telephone number on your member ID card to verify whether or not Quest is in-network with your plan.
